## Eidfjord Cruiseport - Hardangerfjord

Eidfjord is located in the innermost part of the famous Hardangerfjord. In May 2005 Eidfjord Cruise Port opened, and has become a famous port since the opening. The cruise port is located in the centre of Eidfjord and offers the very best and safest conditions.

In 2005 we were the winner of “the Most Improved Port Facilities”, Dream world Cruise Destinations 2005 Awards and we received a new price in 2006 for “the Most Improved Destination”, Dream world Cruise Destinations 2006 Awards.

Eidfjord has a population of around 950. We are a thriving community and enjoy the fjord and mountains throughout the year. Hardangerfjord is the second longest fjord in Norway, 179 km – also called the Queen of the Fjords.

Vøringfossen waterfall has for a long time been Norway’s most visited natural attraction. The Hardangervidda plateau and the Hardangerfjord are well-known far beyond Norway’s borders.

Due to the mild climate the region is also the orchard of Fjord Norway – here we grow apples, plums, pears and cherries. The blossom season in May/June is unique – the mountain sides are covered by white, pink and red flowers, from the white snow at the top down to the blue fjord. July – October is the harvesting season with fruit, morello- and cider festivals in the small villages along the fjord.

Eidfjord offers a unique natural environment. With large contrasts and small distances you can experience the most and best of what Norway has to offer. Our visitors can find peace and quiet in the natural environment, in addition to visiting many of our attractions. Eidfjord is the gateway to the Hardangervidda, the largest high mountain plateau in Europe and Norway’s largest national park.

According to the saga, the influential and mighty Rich-Ragna, who ruled at the time, has been credited with the building of this church. Her reason for building the church lay in her desperate need for forgiveness for all her wicked deeds. Amongst her many spiteful deeds she allowed her own husband to drown while they were on their way to town. She left him on a reef and when the tide came in, he drowned. Some of the stonewalls in the church measure as much as 5 ft in thickness. The pulpit is probably from about A.D. 1613.
